

SECOTEC Engineering GmbH was founded in 2009 and is a further business development of Ingenieurbüro H.G. Seimetz. It is an innovative company with an experience of more than 20 years in the field of powder press technique, special machine manufacturing and mechanical engineering. Many years of experience as technical manager at the press manufacturer KOMAGE Gellner Maschinenfabrik KG, as well as the experience with worldwide customer contacts and projects build the basis for this.

Seit unserer Gründung im Jahre 2006 wurden Projekte im In- und Ausland realisiert.

Since our foundation in 2006, we have already realised several national and international customer projects.

These include:

- Product optimization
- Process optimization for existing products
- Development of new materials to optimize the product quality
- Development, construction and fabrication of dosing systems with filling and press on function for special applications
- Development and construction of systems for liquid measuring

A flexible team, which is available for different requirements, means for our customers to have always a professional and qualified contact person.
